

# CURE Voyage Bead Order Form

## CURE Voyage Bead Program

### What are CURE Voyage Beads?

CURE Voyage Beads are a visual way for children to record their voyage through treatment. Beads of various colors and shapes, each representing a particular treatment or procedure are strung on a cord. Children will add beads as they go through treatment and will build a tangible documentation of their journey.

### How do CURE Voyage Beads work?

Children who wish to participate in this free program will be given a length of cord strung with beads that spell their first name. Colored beads representing treatments and procedures will be available to add to the necklace by request.

### Do I have to participate?

Not at all. Participation in the CURE Voyage Bead Program is completely voluntary. You can start or stop at any time. The program is meant to be interesting and fun.

### Must I be a certain age to participate?

CURE Children ages five and over can participate. Because of the hazard small beads can pose, we ask that parents of children under the age of five handle the beads for their child.

### Is there a cost for the program?

No. The CURE Voyage Bead program is free to our CURE families

### Can I modify the program to fit my child's needs?

Absolutely! The CURE Voyage Bead Program is meant to be flexible. The idea is for children to be able to tell their unique treatment story in their own way.

### How do I receive my beads?

Order forms can be turned in directly to the CURE Parent Advocates or can be given to staff either at Inpatient or Outpatient to be given to the CURE Parent Advocates. You can also text/email your order to Kiersten at 585-697-4470 [Kiersten.Kunick@curekidscancer.com](mailto:Kiersten.Kunick@curekidscancer.com) or Adella at 585-697-4836 [Adella.Ivison@curekidscancer.com](mailto:Adella.Ivison@curekidscancer.com)
